5 Step Manual Dishwashing Procedure

1. Prewash  
2. Wash  
3. Rinse  
4. Sanitize  
5. Air Dry

Types of Sanitizers:
- Chlorine Solution: 50-100 ppm
- Quaternary Ammonium Compound Solution: 200 ppm
- Anionic Acid Solution: 200 ppm
- Iodine Solution: 25 ppm

Sanitizing Solutions must be maintained at an effective level.  
Verify effective concentration stated by the manufacturer.

*Each sanitizer type requires a corresponding test kit.
