FOR IMMEDIATE RELEASE- Update July 16, 2020

As of July 16, 2020, at 3:00 pm there have been 3869 total tests, 3787 negative results, and 42 positive results. The newest positive case is a male in his 30’s who is recovering at home. Of the forty-two cases: thirty-eight are recovered, zero are hospitalized, and four are isolating at home.

Recovered positive cases are safe to return to normal daily activities. They are no longer infectious and not required to isolate at home.

The best way to protect yourself and others is to stay at home as much as possible especially if you are experiencing signs of illness, wear a fabric face covering when in public, practice social distancing by staying at least 6 feet away from other people, wash your hands regularly with soap and water for at least 20 seconds, and to clean frequently touched surfaces and objects daily.

Remember if you plan to attend any large gatherings, and are unable to socially distance, please wear a cloth face covering. It is also important to monitor for any symptoms of COVID-19 for 14 days after attending a large gathering. If you develop symptoms, even mild, please contact your health care provider for testing.

Continue to refer to the county website at www.vernoncounty.org, the Centers for Disease Control, and the Wisconsin Department of Health Services web pages for additional information.

Please refer to the new release of Coulee Covid-19 Compass as it relates to Vernon County Guidance as well as statistics for surrounding counties. You can access the Coulee Covid-19 Compass at covid19compass.org.
